

# SCIENCE & TECHNOLOGY

## WORK GROUP

### 2024 Co-Chairs:

Louise Laing | Crowcon  
Adrian McConnell | CO Research Trust

 Coalition.NCOAA.us

## About Our Work

The lack of robust diagnostics and effective treatments leaves many carbon monoxide victims and survivors unaware that they have been poisoned. If diagnosed, they are faced with insufficient therapies to address the complex health issues they may now face as a result of carbon monoxide poisoning.

This working group will examine new technologies for improving diagnostic testing and review new therapies currently under research. They will amplify the voices of survivors and victims who interface with the medical system and are often left with more questions than answers.

Their goal for the first year is to Coordinate research with CORT, Collaborate with other working groups on prevalence studies, and publish medical journals, such as the American Journal of Public Health.

## Our Initial Goals

①

### Assess

Coordinate with CORT to support their ongoing research projects

②

### Analyze

Publish in scientific journals (e.g., AJPH)

③

### Implement

Partner with Data Surveillance Work Group on U.S. prevalence study

## MARK YOUR CALENDARS

**First Tuesday Each Month  
at 1 pm Eastern**

Work Group Meetings

**January 23, 2024  
at 1 pm Eastern**

Coalition-Wide Semi-Annual  
Meeting

**July 29-31, 2024**

CO Safety Summit  
Kansas City
